ZAID AMANEH

Damascus, Syria
Mobile: +963-944373305, **Tel:** 11-2330227
E-mail: amanahzaid627@gmail.com

OBJECTIVE

Junior Flutter Developer with strong UI/UX design skills and great talent of problem-solving. Seeking a full-time role to apply my hands-on experience in mobile app development, clean architecture, and modern design tools like Figma. Passionate about building scalable, user-focused applications.

EDUCATION

Damascus University ITE| Bachelor of software engineering, Damascus Syria | **2022- Present**

- Third Year

Projects & Personal Work

Flutter Developer & UI/UX Designer | Oxytocin Clinic Management App
Personal Project – 2025

Description:
Oxytocin is a mobile application designed to simplify clinic management by allowing patients to browse doctors, filter by specialty, and book appointments seamlessly. The app provides an intuitive interface, secure authentication, and real-time notifications.

1. Developed the full mobile app using Flutter with **Bloc** and **Provider** for state management.
2. Implemented secure authentication with role-based access for patients and doctors.
3. Integrated APIs for doctor search, appointment booking, and medical record management.
4. Used **go_router** for scalable and structured navigation across multiple screens.
5. Added **push notifications** to remind patients of upcoming appointments.
6. Designed a professional, user-friendly UI in Figma, including branding and a custom logo.
7. Used Git & GitLab for version control and collaborative workflows.

Technical Highlights:

- **Architecture:** MVVM design pattern for maintainable and scalable code.
- **State Management:** Bloc & Provider for predictable and organized state handling.
- **Navigation:** go_router for flexible and declarative routing.
- **Notifications:** Firebase Cloud Messaging (FCM) for real-time updates.
- **Backend Communication:** HTTP package for API integration.
- **Version Control:** Git & GitLab.
- **Design Tools:** Figma for wireframes, prototypes, and branding assets.

Flutter Developer & UI/UX Designer | TURBO Delivery App
Personal Project – 2025
Description:
Turbo is a dynamic and user-friendly delivery application designed to simplify the ordering and delivery process. It connects users with various stores, allowing them to browse products, place orders, and track deliveries in real-time.

1. **Developed full-stack delivery app using Flutter and Bloc for state management.**
2. **Integratedauthentication with WhatsApp-based OTP and secure user sessions using SecureStorage.**
3. **Implemented map-based location picker and store browsing with OpenRouteService API.**
4. **Designed modern, responsive UI in Figma, implementing clean MVVM architecture.**
5. **Used Git & GitLab for version control and collaborative workflows.**
6. **Created a separate admin panel for product and order management using Flutter web.**

Technical Highlights:

- **Architecture:** MVVM design pattern for scalability and maintainability.
- **State Management:** Bloc & Cubit for organized logic handling.
- **Navigation:** GetX for seamless routing between views.
- **Backend Communication:** HTTP package for API integration.
- **Version Control:** Git & GitLab.
- **Design Tools:** Designed interfaces using Figma with responsive layouts.

Flutter Developer | Notes App
Personal Project – 2024
Description:
A minimalist note-taking application with offline storage functionality.

1. **Built core CRUD operations (add, edit, delete notes) using Flutter and local storage.**
2. **Implemented clean and responsive UI inspired by material design principles.**
3. **Managed state using Bloc for modular and efficient app logic.**
4. **Created all designs using Figma for consistent visual presentation.**

Flutter Developer | Flash Card Quiz App
Personal Project – 2024
Description:
An interactive quiz and learning tool based on flash card logic.

1. **Developed CRUD operations for question creation and management.**
2. **Created quiz functionality with result tracking and score summaries.**
3. **Used Provider for lightweight and efficient state management.**
4. **Designed an engaging user interface in Figma with responsive layouts and clean design.**

SKILLS

• **Software tools:**	Microsoft Office	**Software tools:** Expert
• **Languages & Frameworks:**	Dart, Flutter, Java, C++, Firebase, JSON	**Software tools:** Expert
• **State Management:**	Bloc, Cubit, GetX, Provider	**State Management:** Expert
• **Tools:**	versioning tools,Git, GitHub, GitLab, Figma, SecureStorage	**Tools:** Strong
• **Development Skills:**	REST API integration, Responsive UI, Local storage, MVVM architecture	**Development Skills:** Strong
• **Design:**	UI/UX Design Principles, Prototyping, Wireframing in Figma	**Design:** Strong
• **Soft Skills:**	Problem-solving, troubleshoot,Team collaboration, knowledge sharing, Attention to Detail, Agile familiarity	**Soft Skills:** Expert
• **Languages:**	Arabic (Native), English (Good)	**Languages:** Strong

INTERESTS

Volunteering and traveling, making new friends, football, Chess and table tennis
