Professional Summary

A Telecommunications and Electronics Engineer with a Bachelor's degree from Tishreen University. Eager to launch my career by applying technical expertise in telecommunications systems, programming, and web development. Skilled in both software and hardware aspects of telecommunications, with a strong foundation in mobile communication systems, internet protocols, and wireless networks. Seeking an opportunity to develop my skills and contribute to innovative projects in a forward-thinking organization.

Projects and Experience

Cellular Communication System Analysis
Conducted an in-depth study of GSM, GPRS, and LTE systems, focusing on their design, functionality, and real-world applications.

Web Development Portfolio
Designed and developed interactive web pages using HTML, CSS, PHP, and MySQL, showcasing functional user interfaces and back-end integrations.

Network Programming with Python
Programmed network functionalities and simulations, utilizing Python to implement protocols and troubleshoot network issues.

Electronics Circuit Design
Worked on designing and assembling electronic circuits, improving understanding of hardware systems and troubleshooting techniques.

Skills

Programming Languages: C++, Java, Python (including OOP and network programming).

Web Development: Proficient in HTML, CSS, PHP, MySQL for designing and developing websites.

Telecommunications Expertise:

In-depth knowledge of cellular communication systems and their generations (GSM, GPRS, LTE).

Understanding of internet protocols (TCP/IP, OSPF, RIP, BGP).

Hands-on experience with wireless communication systems and radio infrastructure.

Electronics: Proficient in handling electronic circuits and systems.

Languages:

Arabic : Native

English: Very Good

Education

Bachelor's in Telecommunications and Electronics Engineering, Faculty of Mechanical and Electrical Engineering, Tishreen University, Syria (Graduated 2023)
