Amman, Jordan

TELECOMMUNICATION AND ELECTRONIC ENGINEER

Highly skilled Integrated Telecommunication Engineer with expertise in Wireless, Microwave, and Optical Transmission technologies. Proven ability to lead and execute complex projects from conception to implementation. Strong background in 5G, RF spectrum analysis, network optimization, and equipment commissioning. Excellent troubleshooting skills and a commitment to staying abreast of technological advancements. A collaborative team player with a passion for delivering innovative solutions in telecommunications.

TRAINING / COURSES

- CCNA 200-301
- MCSA(Microsoft certified Solution Associate)
- AZ900T00(Microsoft Azure Fundamentals)
- AZ104T00(Microsoft Azure Administrator)
- MATLAB
- Atoll Tools
- Ms. Office

PROFESSIONAL EXPERIENCE

Optical Transmission Engineer **11/2019 - 09/2021**

My Communication

Specialized in High-Level Design (HLD), Low-Level Design (LLD), Technical Design, and Bill of Quantities (BOQ), with expertise in OSN 9800, OSN 8800, and OSN 1800. Experienced in installation, handover processes, and ensuring seamless integration of optical transmission systems for optimal performance. Proficient in ISP Architecture of Optical Access Network, PON, WDM, CWDM/DWDM, OLT, Optical amplifiers, and OTN. Skilled in OSP definitions, systems, components, splicing, and testing.

Designed and implemented a high-speed fiber optic network spanning 40km and 20km using G.652 fiber, with a fiber loss strategy of 0.2 dB/km and a 5dB margin for signal integrity. Implemented protection schemes including ponder on the client side and OLP/DCP, M520SM on the line side. .Installed and configured two 9800 M12 devices, one for the east and one for the west, with separate racks for each device. Engineered for a capacity of 2x100GE and a line rate of 200G, with a channel scalability plan from 40 to 96 channels. Designed and implemented a ROADM system for CDC. .Planned network architecture, selected suitable equipment, optimized transmission paths, and troubleshooted and maintained optical transmission systems. Completed within budget, including 10% spare parts and OPEX for 5 years.

Wireless Transmission Engineer **09/2021 - 09/2023**

My Communication

- Specializing in 5G networks, I excel in planning, design, coverage analysis, antenna placement, and network optimization. I create reliable 5G networks, addressing URLLC, mMTC, and eMBB challenges. With a keen eye for detail, I contribute to seamless 5G integration, specializing in radio network planning using Atoll. My experience includes designing and implementing tower base stations for 2G, 3G, and 4G networks, and RF planning for GSM, UMTS, and LTE, ensuring optimal coverage, capacity, and performance.
- Designed and Implement base station (BTS) for seamless integration of 2G, 3G, and 4G networks, optimizing coverage and capacity. Conducted RF planning for GSM, UMTS, and LTE technologies, significantly improving signal quality and network performance. Led comprehensive site surveys, evaluating environmental factors and user requirements to deliver tailored solutions. Leveraged expertise in base station design, RF planning, and site survey to ensure the efficiency and reliability of telecommunication networks. .Design & planning Wireless transmission Network by using different Vendor's equipment's Nokia, Ericsson, Huawei e. Expert in E2E Site, 5G E2E, Site selection, Survey, Site acquisition, Design (2G.3G.4G.5G power calculation), QoS, Materials configuration, Installation, Integration, optimization, Post DT, handover.

Microwave Transmission Engineer **09/2023 - 09/2024**

My Communication

- Microwave Transmission Engineer My Communication 09/2023 - 09/2024 Jordan Designed and implemented microwave links for telecom networks, conducting site surveys, frequency planning, and equipment configuration using Huawei RTN620, RTN910, RTN950, and RTN980 for 2G, 3G, and LTE networks.
- Implemented and designed microwave transmission networks using various vendors' equipment like Siemens, Ericsson, NEC, Startex, and Huawei. Also, designed N+N backbone links with NEC equipment and performed network dimensioning to meet access and core traffic requirements.
- Reviewed internal site lists to identify potential drain candidates and confirmed Technical Site Survey Reports (TSSRs) from a transmission perspective. Analyzed Line of Sight (LOS) availability for new links using Google Earth and Pathloss, arranging surveys for verification. Completed Pathloss Engineering Design and prepared Link Budgets for customer approval and implementation in 2G, 3G, and LTE networks.
- Monitored network using U2000, checked overbooking, optimized frequency and capacity, monitored KPIs, planned redundant paths, supported implementation, designed routes, prepared budgets, checked link performance, analyzed BOQs, maintained updates, provided solutions, collected information, met timelines, collaborated with regulatory teams, and managed multiple projects.
- Expert in: Link type Propagation, Polarization, Transmission signal, Antenna Gain, Half power 3db, Cross polarization, VSWR, Front to back ratio (Frequency, Band, Wave length, Distance. LOS, nLOS, NLOS) Definition, Calculation and types MW Design, topology, network Architecture, IDU, ODU, Xpic Protection, Diversity (FD, SD), N+N Link, MIMO, sectorization, Multi bands ODU PDH, SDH (Protocol) And Frame, Modulation, Alignment.

EDUCATION

Bachelor's degree in Telecommunications and Electronic Egineering

Tafila Technical University(TTU) **09/2011 - 07/2015 Tafila, Jordan**

SOFT SKILLS

.Troubleshooting and Maintenance . Team Collaboration .Project management
. Problem solving skills . Adaptability . Regulatory Compliance . Adaptable . Analytical Thinking
