Mohamed Ghonemi Shokr

Transmission Engineer

Alexandria, Egypt | mohamedshokr93@gmail.com | +201090290245 | LinkedIn

PROFESSIONAL SUMMARY

Transmission and Telecommunications Engineer with 8 years of experience in optical transmission systems. Skilled in DWDM, OTN, FTTH, and submarine cable operations, with strong expertise in network design, analysis, and system optimization. Experienced in cross-functional collaboration, NOC operations, and technical troubleshooting using multivendor platforms. Demonstrated commitment to system reliability and safety.

EDUCATION

Bachelor of Engineering in Communications & Electronics **2012 - 2016**
6th of October University
- **Grade:** Excellent

PROFESSIONAL EXPERIENCE

Transmission O&M and NOC Engineer **Nov 2020 - Present**
Telecom Egypt | Trainer - Submarine Cable Department from (Sep 2023)
- Conduct training sessions for engineers on optical transmission systems and NOC operations, focusing on O&M and troubleshooting procedures.
- Operate and maintain DWDM and OTN transmission networks to ensure high system availability.
- Led the Backup NOC team for the IMEWE submarine cable, overseeing network performance, fault recovery, and service continuity.
- Perform route analysis, configuration updates, and network optimization for transmission links.
- Responsible for troubleshooting and restoration of DWDM national backbone transmission rings across Huawei, Nokia, Ciena, Alcatel, and Infinera platforms.
- Support preventive maintenance and system performance monitoring to reduce downtime.
- Prepare technical reports, documentation, and coordinate with internal and external stakeholders.

Demonstrator **Oct 2019 - Oct 2020**
Faculty of Engineering, 6th of October University
- Delivered academic instruction in Modern Physics and supported engineering laboratory sessions.
- Contributed to curriculum development and improved student learning outcomes.
- Assisted in preparing technical materials and assessment tools to support course delivery.

Antenna Officer **May 2017 - Sep 2019**
Egyptian Air Defense Forces
- Managed antenna and communication systems, ensuring continuous network performance.
- Conducted signal testing, calibration, and preventive maintenance under operational conditions.
- Coordinated with technical teams to ensure system readiness and fault resolution during missions.

Demonstrator **Jul 2016 - Apr 2017**
Faculty of Engineering & Applied Medical Sciences, 6th of October University
- Taught and supervised laboratory sessions in Modern Physics and Electronics.
- Supported research activities and academic projects related to electronic systems and measurements

Instructor **Jan 2014 - Jul 2016**
Resala Training Centre (RTC)
- Delivered technical training in Solar Energy Systems and Electronics to engineering trainees.
- Prepared hands-on workshops and performance evaluations to reinforce applied learning.

COURSES

- Nokia 1830 PSS WDM Operation & Maintenance (Nokia, Turkey)
- WS-NOC (NFM-T) R.23 WDM O&M (Nokia, Turkey)
- FTTH Technology Program (Telecom Egypt)
- CCNA Certification
- Microwave & Optical Transmission (Telecom Egypt)
- DWDM Program (Telecom Egypt)
- Mobile Systems 2G/3G/4G (JELCOM)
- Microcontroller & PCB Design (JELCOM)

TRAINING

- Nokia 1830 PSS WDM Operation & Maintenance
- Alcatel & Huawei Transmission O&M
- Data, VOIP & Wireless Networks - Ministry of Communications
- Optical Fiber Faults & Automation - Telecom Egypt
- Army Factory Training - Benha Electronics Company

ACTIVITIES

- Volunteer & HR Committee Head, Resala Charity Organization
- Led technical and community development initiatives (2013-2015)

SKILLS

Technical Skills

- DWDM, OTN, FTTH, SDH
- Fiber Optic Transmission and Submarine Cable Systems
- Smart Grid Integration and Renewable Energy Interconnections
- Right-of-Way Planning and Environmental Impact Assessment
- Network Operation Center (NOC) Operations and System Monitoring
- Preventive Maintenance, Fault Diagnosis, and System Troubleshooting
- Construction Documentation, Material Takeoffs, and Safety Compliance
- PFE of Submarine Systems, C-OTDR / OTDR Testing and Fault Localization

Soft Skills

- Analytical Thinking and Problem Solving
- Leadership and Team Collaboration
- Effective Communication and Technical Reporting
- Project Coordination and Time Management
- Attention to Detail and Decision Making
- Adaptability and Continuous Learning
- Mentoring and Knowledge Sharing
- Safety Awareness and Professional Integrity

LANGUAGES

- **Arabic:** Native
- **English:** Very Good
