SIZAR AHMAD SHAABAN
Telecommunication Engineer
Syria| +963 932 566 747 | sizarshaaban657@gmail.com
Nationality: Syrian | **Marital Status:**Single | **Driving License:**Valid

---

Professional Summary

Result-driven Telecommunication Engineer with strong expertise in Optical, Wireless, and Microwave Transmission. Specialized in 5G planning, RF optimization, and high-capacity fiber networks. Proven ability to lead full project lifecycles — from design to integration. Adept at troubleshooting, network planning, and delivering optimized telecom solutions with precision.

Professional Experience

Optical Transmission Training
My Communication – Jordan Oct
2024
- Designed & deployed high-speed fiber optic networks (40km & 20km, G.652) with 0.2 dB/km loss and 5dBmargin.
- Installed OSN 9800 M12 systems with 2x100GE capacity and CDC ROADM with 96-channel scalability.
- Executed HLD/LLD documentation, BOQs, and configuration for OLT, DWDM, and OTN.
- Led planning, testing, commissioning, and smooth handovers while adhering to budget and SLAs.

Wireless Transmission training
My Communication – Jordan
2024
- Led RF planning and optimization for GSM, UMTS, LTE, and 5G networks.
- Designed base stations for 2G, 3G, 4G using tools like Atoll and vendor systems (Nokia, Ericsson, Huawei).
- Conducted site surveys, acquisition, power calculations, integration, and network optimization.
- Addressed URLLC, mMTC, and eMBB challenges in advanced 5G deployment.
- **Microwave Transmission Training**
- My Communication - Jordan
- 2024
- Designed and implemented microwave links for telecom networks, conducting site surveys, frequency planning, and equipment configuration using Huawei RTN620, RTN910, RTN950, and RTN980 for 2G, 3G, and LTE networks Implemented and designed microwave transmission networks using various vendors' equipment like Siemens, Ericsson, NEC, Startex, and Huawei. Also, designed N+N backbone links with NEC equipment and performed network dimensioning to meet access and core traffic requirements Reviewed internal site lists to identify potential drain candidates and confirmed Technical Site Survey Reports (TSSRs) from a transmission perspective. Analyzed Line of Sight (LOS) availability for new links using Google Earth and Pathloss, arranging surveys for verification. Completed Pathloss Engineering Design and prepared Link Budgets for customer approval and implementation in 2G, 3G, and LTE networks Monitored network using U2000, checked overbooking, optimized frequency and capacity, monitored KPIs, planned redundant paths, supported implementation, designed routes, prepared budgets, checked link performance, analyzed BOQs, maintained updates, provided solutions, collected information, met timelines, collaborated with regulatory teams, and managed multiple projects Expert in: Link type Propagation, Polarization, Transmission signal, Antenna Gain, Half power 3db, Cross polarization, VSWR, Front to back ratio (Frequency, Band, Wave length, Distance. LOS, nLOS, NLOS) Definition, Calculation and types MW Design, topology, network Architecture, IDU, ODU, Xpic Protection, Diversity (FD, SD), N+N Link, MIMO, sectorization, Multi bands ODU PDH, SDH (Protocol) And Frame, Modulation, Alignment

---

🎓 Education

Bachelor's Degree in Telecommunication Engineering
Tishreen University – Syria
Jan 2019 – Aug 2024

📜

🧶 Certifications & Training

- **HCIA 5G Certification**
- **Integrated Telecom Engineering Program** (Optical, Wireless, Microwave Transmission)

🛠️ Technical Skills

- **Planning Tools:** Atoll, MS Excel, PowerPoint, Office Suite
- **Technologies:** DWDM, PON, LTE, 5G, GSM, UMTS
- **Systems:** OSN 9800/8800/1800, OLT, ROADM, OTN
- **Expertise:** RF Planning, Network Design, Site Acquisition, BOQ, HLD/LLD
- **Soft Skills:** Teamwork, Adaptability, Problem Solving, Project Leadership

🌍

🎴 Languages

- **Arabic:** Native
- **English**: Intermediate(reading , writing , communication)
