YAZAN AKIL

Kuwait | +965 65523204 | yazanakil65@gmail.com

Professional Summary

Electrical & Electronics Engineer specializing in Telecom Power Systems and IT Infrastructure. Experienced in leading field teams and managing large-scale projects including rectifier and battery installations across 300+ STC telecom tower sites, and IT network rollout for 50+ branches. Skilled in site engineering, DC power systems, structured cabling, device configuration, and project execution. Proven ability to ensure engineering standards, quality control, and efficient project delivery.

Work Experience

Electrical & Electronics Site Engineer – Telecom & IT

General Trading Establishment – Kuwait | Aug 2024 – Present

- Project Lead – Telecom Power Systems Upgrade: Managed installation and commissioning of rectifiers and lithium/lead-acid batteries across 300+ STC telecom tower sites.
- IT Network Technical Team Leader: Led deployment of IT and network infrastructure for 50+ branches including rack installation, structured cabling, and network configuration.
- Implemented Smart Key Access System across telecom sites to enhance security and access control.
- Supervised Floor Box installation across various sites ensuring electrical safety and proper termination.
- Technical Lead for The Avenues Kuwait Application Project, ensuring onsite technical operations and vendor coordination.
- Assisted in electrical planning, load calculations, and building electrical system design in Jahra site.
- Gained experience in cable routing, distribution boards, SLDs, BOQs, and site coordination.

Electrical Engineer Trainee

Combined Group Contracting Company – Kuwait | Jun 2022 – Aug 2022

- Contributed to electrical works at the Ministries Complex Project including parking electrical systems and solar panel installations.

- Developed knowledge in renewable energy applications, safety compliance, and electrical installation supervision.

Key Projects

STC Rectifier & Battery Upgrade Project – Project Lead: Led power system upgrades across 300+ telecom tower sites.
Burgan Bank IT Cabinet Rollout – IT Network Team Leader: Managed IT room setup and network cabinet installation for 50+ branches. Smart Key Access Deployment – Site Engineer: Deployed smart access control across telecom sites.
The Avenues Kuwait App Project – Technical Field Lead: Led onsite execution and technical integration.

Graduation Project

Life with Arduino – Smart Navigation for the Blind

Developed an Arduino-based smart navigation system to support visually impaired individuals by using sensors to detect obstacles and a coded light-based indicator to help identify their location indoors and outdoors.

Technical Skills

Electrical & Power Systems: DC Power Systems, Rectifiers (Eaton/Huawei), Lithium & Lead-Acid Batteries, Electrical Safety, Cable Routing
Telecom & IT Infrastructure: Structured Cabling, Rack & Cabinet Setup, Network Devices Installation, Access Points, Switching & Routing Basics
Project & Site Management: Team Leadership, Site Supervision, Vendor Coordination, Quality Assurance, Troubleshooting, Reporting
Software & Tools: MS Office, Visio, Basic AutoCAD, Ticketing/Reporting Tools and Ardouni

Education

B.Sc. in Electrical and Electronics Engineering – Işık University – Istanbul, Jul 2024

CCNA – Cisco Certified Network Associate – CNAA, Kuwait, Jun 2025

Integrated & Strategic Communication Campaigns – Communication Academy, Mar 2025 – Jul 2025
